SAKAR CLEANBOTS

AUTONOMOUS FLOOR-CLEANING ROBOTS

AUTOMATE ROUTINE CLEANING. ELEVATE FACILITY OPERATIONS.

ImageLink presents the SAKAR CleanBots range for consistent, intelligent floor care across commercial and industrial environments.

THE CLEANBOT RANGE | Choose the platform to match your facility size and cleaning requirements. High-Capacity and Advanced Autonomous Cleaning.

SAKAR CleanBot 5000

Compact 4-in-1 professional floor cleaner | Small to medium spaces

- Sweeping, scrubbing, vacuuming and mopping
- Carpet mode and side-brush cleaning
- Up to 3.5 hours battery life; 2-hour charging time
- 10 / 15 L tank capacity; 1 L trash bin
- 600 mm pass-through width and height

KEY FIGURES • 26 kg (excluding water) • 0.6 m/s max. moving speed

SAKAR CleanBot 5000Plus

Professional cleaning robot | Medium to large spaces

- Sweep and scrub in one pass; triple-roll dry-wet separation
- Up to 5 hours runtime in sweeping or scrubbing mode
- Cleaning efficiency up to 1,100 m^2/hour
- 16 L clean-water and 14 L waste-water tanks
- Automatic recharging and hands-free water services with workstation

KEY FIGURES • 70 kg with battery • 560 mm sweeping width

SAKAR CleanBot 20000

High-capacity floor-cleaning robot | Large-area operations

- Triple-roll system; scrubbing, squeegee and vacuum functions
- Up to 5 hours runtime
- Maximum cleaning efficiency up to 2,376 m^2/hour
- 60 L clean-water and 47 L waste-water tank capacity
- 550 mm scrubbing width; dual-battery configuration

KEY FIGURES • 150 kg with battery • 4-hour charging time

SAKAR CleanBot 20000Plus

Advanced autonomous scrubber | Commercial & industrial facilities

- Vision and LiDAR fusion navigation with multi-sensor perception
- Autonomous obstacle avoidance and intelligent positioning
- Up to 4 hours runtime; maximum moving speed 4 km/h
- 70 L clean-water and 50 L waste-water tank capacity
- 510 mm cleaning width; 27 kg ground pressure

KEY FIGURES • 254 kg (excluding water) • 2.5-hour charging time

SUITABLE ENVIRONMENTS: Offices • Retail spaces • Hotels • Hospitals • Commercial buildings • Warehouses

INTELLIGENT CLEANING CAPABILITIES

AUTONOMOUS NAVIGATION Mapping, positioning and obstacle avoidance using laser, camera and sensor technologies, depending on model.	**MULTI-FUNCTION CLEANING** Model-dependent sweeping, vacuuming, scrubbing, mopping and carpet-cleaning functions.
DIGITAL MANAGEMENT App-based controls, operational data and reporting capabilities on supported models.	**AUTOMATED WORKSTATION** Automatic charging, clean-water refill and wastewater drainage on supported configurations.

YOUR SOLUTION PARTNER: IMAGELINK

ImageLink specializes in AI-powered surveillance integration, centralized monitoring systems and intelligent automation platforms. We help organizations connect technology, improve operational visibility and deploy scalable solutions for modern business and industrial environments.

Our broader capabilities include multi-site NVR/DVR integration, intelligent face recognition, ANPR, weighbridge automation and enterprise monitoring. For SAKAR CleanBots, ImageLink can support solution consultation and customer engagement around the deployment of autonomous cleaning technology.

CONSULT	DEPLOY	SUPPORT
Application & site discussion	Coordination & commissioning	Customer assistance

LET'S DISCUSS YOUR CLEANING AUTOMATION REQUIREMENTS
